

## 2012 Fall 'SIWzie' Awarded Papers

After each workshop or conference, the Conference Committee or Program Committee solicits nominations from the Session or Forum leadership for papers considered to be "the most important to be read by the people who were not able to attend the Workshop or Conference." Nominated papers are then read by the members of the Conference Committee or Program Committee, who vote for the papers considered to be the most significant presented at the workshop.

Below is the list of those papers that have been nominated to receive a 2012 Fall "SIWzie" Award. The papers are listed in descending order of consensus among the judges. Equally ranked papers are listed in numerical order. To view the individual papers, go to website: <http://www.sisostds.org/SIW.htm>

- 12F-SIW-029**      **Planning the Standards Landscape: A Framework for Deliberate Interoperability**  
*Jeff Abbott, CAE USA*  
*Dannie Cutts, AEGIS Technologies*  
*Kevin Gupton, University of Texas at Austin*  
*Robert Lutz, Johns Hopkins University/APL*
- 12F-SIW-021**      **Development of a Distributed Cyber Operations Modeling and Simulation Framework**  
*Henry Marshall, Simulation & Training Technology Center (STTC)*  
*Chris Gaughan, Simulation & Training Technology Center (STTC)*  
*Timothy Good, TASC, Inc.*  
*Joseph McDonnell, Dynamic Animation Systems*
- 12F-SIW-045**      **A Standards Development Framework for C-ML Phase 2 and Beyond**  
*Kevin Gupton, University of Texas at Austin*  
*Kevin Heffner, Pegasus Research & Technologies*
- 12F-SIW-010**      **Calculating & Using Confidence Intervals for Model Validation**  
*Dr. Mikel Petty, University of Alabama*
